WI-FI SMARTPHONES

WI-FI FEATURE PHONES

ENTERPRISE DECT

VERSITY 92 SERIES	VERSITY 95/96 SERIES	84 SERIES	DECT SERVERS	DECT HANDSETS
A mid-tier voice over Wi-Fi compact all-in-one enterprise touchscreen smartphone Smaller and more economical than our premium smartphone solution with a 4" touchscreen display Award winning durable design for demanding environments; IP65 for water and dust resistance Dragontrail™ glass Shift-replaceable battery pack and up to 14 hours of talk time Ideal for task management applications and voice-centric workflows SAFE functionality Combine scanners, radios, walkie-talkies, phones, and mobile computer into an all-in-one solution for quieter work environments with best-in-class, engineering optimized voice. Also supports texts, instant messages, and Push-to-Talk functionality	A premium voice over Wi-Fi all-in-one enterprise touchscreen smartphone Award winning slim design with large 5.2" display for a better experience for users of heavy data application Durable; toughest device in the market; IP68 rated; resistant to dust, drops and liquids for optimal performance in the harshest environments Gorilla™ Glass True hot swappable batteries for zero downtime settings and up to 15 hours of talk time For data-driven workflows (lengthier communications, patient records) and more complex applications SAFE functionality The all-in-one solution functionality of our Versity 92 Series plus heavy data functionality through largest touchscreen and stronger processor The 96 Series is LTE cellular enabled (Available only in EMEA and APAC)	Cost-effective Wi-Fi feature phone with excellent telephony and WLAN interoperability built for voice critical communications Lightweight and easy to use with a simple work screen and traditional buttons Durable; holds up in the harshest environments and can be cleaned with most commercial cleaners Robust glass-free screen for clean environments Long lasting batteries for up to 12 hours of talk time Minor application alerts – door and emergency alarms Man-down and panic button functionality Supports text alerts, instant messaging, and Push-to-Talk functionality – eliminates need for two-way radios or overhead paging	Flexible and scalable solutions so infrastructure elements can be added as your business grows. This ensures that your solution always matches your wireless needs Easily integrate with your IP-PBX / UC Call Control platforms as well as a long list of partner applications Seamless multi-cell roaming across large sites and even different locations Certified to the highest level of security on the market VIP-DECT Server One is a software-defined platform that virtualizes large capacity IP-DECT Server deployed to support both central as well as distributed enterprise environments	Feature rich, reliable, and durable, they have been designed with exactly the right feature set and tools to help you do the things you need – like highest quality voice connections, backlit displays for dimly lit areas, panic button, two-way text messaging and so much more All handsets are compatible with each DECT server, making it possible to combine several models in a single wireless system so you can choose the right handset device for each employee based on their specific requirements and needs
IDEAL FOR:		**IDEAL FOR:**	**IDEAL FOR:**	
Customers on a limited budget who want to upgrade from a feature phone to a smartphone Users with voice-critical & task management workflows Users who need more processing power and application integration than our 84 Series	Job functions that need uninterrupted communication around the clock, giving workers constant access to the data and teams they need Users with voice-critical environments that also depend on data driven workflows Users who need more complex applications that require pre-certifications (EHR, Secure Texting, CCC)	Customers that have already invested in Wi-Fi infrastructure and need to connect their critical mobile workers Customers with a limited budget Users with basic application needs who want the simplicity of a phone instead of a mobile computer, but require durability and dependability	Customers who have old legacy systems and cabling based upon analogue and digital who want to migrate to VOIP, cloud services or Hosted Voice platforms Users who want to leverage their investment in circuit-switched or IP/SIP PBX platforms throughout the workplace	Users who need high-quality and secure voice communications across all enterprise environments Users who need specifically designed handsets for key vertical market needs and additional features like "Man Down" and alarm buttons on the handsets for staff safety and protection for remote or lone workers

spectralink

With our enterprise grade, best-in-class mobility solutions, we're with our customers wherever they work, however they need us.

We've been on the forefront of mobility innovation and technology since 1990 and we are proud of our comprehensive, reliable mobility solutions.

Our partnerships with leading UC platforms and world class ecosystem of mobile application providers makes integration and interoperability our specialty. That combined with our market leading reputation and years of experience optimizing secure, best in class voice communication makes us trusted experts in the mobility space.

A Spectralink solution instantly puts job-critical information in the palm of your hands wherever you work within the four walls of your campus or store, and we have a solution for every customer need, budget, and use case.

MOBILE DEVICE MANAGEMENT AND INTELLIGENCE

Complete your solution with our mobile intelligence dashboard for IT Managers

In today's mobile world it's hard to keep things simple and moving. More devices, more users, more applications. How do you manage it all?

AMIE™ (Advanced Mobile Intelligence for Enterprises) keeps your Spectralink Wi-Fi solution and IP-DECT infrastructure running smoothly with easy deployment and centralized administration, analytics for proactively diagnosing issues, and managed services to increase efficiency and keep you focused on your core business.

- **AMIE Essentials for Wi-Fi** empowers your team to take charge of your Spectralink smart devices with fast deployment, centralized device administration and application control.

- **AMIE Advanced for Wi-Fi** empowers your team to keep your Spectralink smart devices running smoothly with device configuration management, health monitoring, utilization metrics, and call performance analytics.

- **AMIE for IP-DECT** optimizes IP-DECT operations and allows IT and telecom teams to focus on uptime. AMIE Advanced for IP-DECT provides centralized administration and control for IP-DECT servers, base stations, and DECT handsets. It also gives a detailed look at the system's performance and alerts when areas need attention.

About Spectralink

As an award winner in mobile technology, Spectralink has been transforming the way our customers work and communicate for 30+ years. Through our determination to do extraordinary things, we enable mobile workforces and empower our customers and partners to explore what's next, what's possible. With our enterprise grade, best-in-class mobile solutions, we are with our customers wherever they work, however they need us. Our people, commitment to innovation and our passion are our foundation for success.
